

MACLEOD FAIR BANNER EVENT IN DISTRICT'S HISTORY

SPLendid DISPLAYS OF FINE STOCK, POULTRY, GRAINS, GRASSES AND VEGETABLES

SAPIRO SAYS PROV.

WHEAT POOL FOR 1923 CROP FEASIBLE

Establishment of a wheat pool in this province for the purpose of marketing the 1923 crop is not only feasible and a possibility, but it is a reality.

A point-blank meeting of the principal issue under discussion in this province during the last few weeks, by Aaron Sapiro in a direct, no-holds-barred, delivered hot at the bat at the meeting of delegates and farmers from all parts of the province at the G. W. V. A. hall Thursday morning.

Ample evidence of the faith that the delegates have in the co-operative marketing leader and the earnestness with which they are taking up the problem confronting them, was demonstrated at the close of the morning conference when yells and hurrahs mingled with heavy clapping to signify the hearty thanks extended to Mr. Sapiro for coming to Alberta to aid the farmers in creating a marketing system for the disposal of this year's crop.

Would Limit The Pool
Emphatic repudiation of any attempt to form a pool including both livestock and wheat or other grains was made by Mr. Sapiro. In answer to a question from a delegate from the south he said:

"Understand, this is not a criticism this is an open meeting to get together to discuss the questions. My candid opinion is that you are adopting a policy that will lead to your ruin. You are going against a fundamental principle that we have found to prove disastrous. In the state of California, we have developed into a veritable laboratory for working out these problems and we have gathered years of experience on these matters. We have had more failures than successes until the last few years. It has been only a short time that we have hit on the right plan, but we have developed some facts that are indisputably correct.

Urges Provincial Pool
In reply to questions from delegates from the southern part of the province and from Olds, Mr. Sapiro advocated the complete cancellation of all existing contracts recently made, even where a "savings" clause was included, and the formation of a provincial pool.

CLASSIFIED ADVERTISING

FOUND—A sum of money on the streets of Macleod. Owner will receive same on proving ownership and paying for this advertisement. Apply to Rev. J. L. Levern, Brocket, Alta. 22-3c

FOR RENT—Five-room fully modern house, with gas, 18th St., Macleod. Also several smaller houses. Apply Town Office, Macleod. 22-2c

FOR SALE—One large cook car \$125; one smaller cook car \$100; one large water tank \$45; one smaller water tank, no top, \$15; one small heater and one wagon for sale. Apply E. McNeil, Stand Off. 22-3c

TO RENT—Furnished house on Twelfth Street—Apply Box 245 or Queen's Hotel. 22-4c

are selling every pound of it co-operatively and successfully."

The movement, he said, was spreading like wildfire. "You men are seeing it quicker than we did in the United States," he continued. "Speaking of the cotton industry, he said that it was one of the finest crops grown, and the United States produced two-thirds of the cotton of the world, of all varieties. It was considered the best of security, for it was almost indestructible, lasting for 70 years. It was the best and easiest crop to handle.

Poor Cotton Returns

"Yet with all this, 1,200,000 families producing cotton from 1912 to 1922, only realized an average income of less than \$300 a year," he declared. "These people farm an average of 20 acres a year. What can a family buy with that? What can they pay taxes with, erect schools, or in general build up the community with such an income as that?" he asked. "The cotton on one of the greatest and surest crops produced, it enriches everybody who touched it with the exception of the producer. He was the man who suffered and so his district and state suffered with him. The south was way behind the times, industrially, educationally and spiritually.

What Was The Trouble?

"What was the trouble? It wasn't the crop, for it was always sure. It was the growers themselves. They had a bad system of marketing. These farmers sold 80 per cent of their crop during the first 40 days. They overlooked the market without regard to its power of absorption. You merchants here don't do business that way. You know where your market is going to be before you get your stock.

Dumping The Crop

"All these cotton farmers knew was to dump their crop on the market, and so they created a low basic price level. They suffered and everything connected with the district suffered. What could be done to remedy the situation?" he asked.

Politics And Economics

"There was no use patting these farmers on the back and sympathizing with them; that would not get anywhere. A political movement would not benefit them. There never has been an economic ill remedied by a political movement. You have got to get an economic remedy for an economic ailment," he said, amid general applause.

Basis of Industry

Mr. Sapiro went on to say that every industry known in the world today was based on group production, supported by group capital. That was the reason that group marketing simply had to follow. Not even shoes were manufactured without first knowing where the market was going to be found.

The Economic Answer

"Marketing is a group problem. We have walked into group industry as a national step," he said. "What about the farm? The farmer grows and sells individually and then he tries to fit in with group finance and group industry. It can't be done satisfactorily. He has got to pool his crop. That is the economic answer to an economic weakness of the pool operations in U.S.

He went on to say that last year there were 220,000 cotton growers marketing their crops under the cooperative system. A total of 240,000 tobacco growers were organized under the system last year. This year cotton would lead tobacco. The farmer is learning that he is the only one to help himself. The situation must be studied from economic standpoint and the farmers were fast realizing that. "The farmers can be brought together along right lines," he declared.

What Farmer Must Do

"As individuals, the farmers dump their crop," said Mr. Sapiro. "Instead of that they must study and practice merchandising. They must be united into co-operative units. That is no use unless the farmer understands the aim. The aim is merchandising. What the merchant and the points to be considered in co-operative marketing?"

Perfect Grading

First, there was the matter of perfect grading. The farmer sold now on government grades and as a result there was difference of from 15 to 18 cents in the milling value. Many farmers had never heard of the words milling value, let alone know what they meant. Mr. Sapiro said that in Minnesota, produced premiums on the milling value showing a difference of from 15 to 18 cents. Rarely, if ever, did this premium move to the farmer.

The second matter to be considered was care in packing. This did not enter so much into the wheat marketing problem. Next was extension of markets to increase consumption and distribute the selling according to the consumption. Fourth was the necessity of controlling the flow to market. This was simply a problem of money and finance and could be handled as easily by the farmer group as by the speculative groups.

Question of Finance

He then went into the question of finance. The farmer in the United States had no difficulty in borrowing what money was required. It was the ease of the problems. "There is money available for any way that the collateral is safe and sound there is no question but that the banks will advance the money. The farmers must be properly organized."

Situation in California

California farmers can get from their banks 100 to 200 millions of dollars to hold their crops for the market," continued Mr. Sapiro. "There is money available for any decent security in the world, when

FINE SHOWING OF PLANTS AND CUT FLOWERS, DAIRY AND DOMESTIC PRODUCE AND LADIES' WORK

GOOD RACING EVENTS AND BIG BASE BALL TOURNAMENT

Macleod's Big Summer Fair opened auspiciously on Wednesday morning with good weather, a big crowd and record exhibits. This year nature has outdone herself in this prolific display of the Macleod district's well known fertility—a great district for agricultural products in both cereals and live stock. Visitors from outside points expressed the greatest surprise speaking comparatively of Macleod's showing of vegetables, grains, grasses, domestic products, flowers, and ladies' work stating that at no other point had they seen such a magnificent display of these products as was shown in the exhibition hall at Macleod's big fair.

In the horse show ring was to be seen exhibits in great numbers and of exceptional quality in all classes. Judge Rawlinson particularly remarked that the showing of heavy horses was a wonderful improvement over exhibits placed before him on the occasion of his last visit here as a judge of these classes. The showing in heavy and light drafts was possibly the most salient feature of the horse show.

Mr. Scott, judging light horses expressed the opinion that some of these classes, particularly ladies saddle horses and single and double drivers, surpassed anything he had ever exhibited he has passed on at any other fair this year.

In the registered classes the leading prize winners were in clydes, Jack McKenzie, of Granum; and Percheron, E. H. Cross, of Macleod. D. Ringland also showed a magnificent team of work horses in harness, landing first prize.

In the cattle classes, Joe Shield was the principal exhibitor in registered Shorthorns with his string of prize winners at Lethbridge, where he topped the big honors this year. In the registered Holsteins, Egbert Wells, of Wellsview, and A. H. Pearson, of Hazelmere, both exhibitors

Board Trade Active For Good Roads

At the regular semi-monthly meeting of the executive of Macleod and district Board of Trade held in McDonald's Hotel, Macleod, Tuesday, August 7th, there were present J. W. McDonald, president; and members Arthur Young, Dr. Farnet, A. F. Grady, Hugh Mackintosh, A. V. Harris and Secretary Winter.

The minutes of the last regular executive meeting were adopted as read. After some discussion Secretary Winter was instructed to write the Minister of Public Works drawing his attention to the bad condition of the Crow's Nest Pass trail from Macleod to the north of Macleod. Tourist traffic, and is thus detrimental to the well as well as to the interests of towns on the route.

The minister was also urged to have immediately replaced the small bridge north of Macleod which had been washed out by recent floods.

Following discussion it was decided that a voluntary contribution box be placed in the Macleod Tourist Camp building—the idea being to apply any revenue from same to improving the camp.

Hugh Mackintosh reported that the Municipal District of Bright had received word that Engineer Keith would shortly make a survey in connection with the bridge proposed to be built across Willow Creek at the Blackfoot Crossing.

A. F. Grady reported that according to instructions from the executive, a sign had been put in place at the top of the hill above the tourist camp, directing tourists to the camp.

WHY THE TIMES IS LATE THIS WEEK

The Macleod Times apologizes to its readers for the lateness of the appearance of this issue.

We believe our subscribers will appreciate the change in the size of the paper and will accept our apology when we state that extra initial work in effecting the improvement in the appearance of The Times (in conjunction with disruption of efficiency by reason of attendance of the entire staff at Macleod's Big Fair) are main factors in this momentary dereliction.

It may be stated that attaining of the present size of the paper taxes the mechanical limitations of our big press to the extent that make-shifts had to be resorted to that involved considerable experimental work, and thus involved in this issue much loss of time—however the difficulties have been surmounted and will not effect future publications.

and Mrs. Alexander Schnarr, of Olsen Creek.

First Day Winners:
Local Ponies—Boys and girls—1st, Echo, ridden by Pat Schnarr; 2nd, Mary Brown, Tom Manyfathers; 3rd, Indian, Edward McFarquhar; 4th, Piping Dot, Miss Chugg.
Ladies' Race—1st, Juliet, Miss Leeds; 2nd, Jiggs, Miss Hewson; 3rd, Tomcat, Mrs. Hobbs; 4th, Fairy, Miss Heister McLean.

Half Mile Indian Race—1st, Strawberry, R. Day Chief; 2nd, Frank, C. Bagin; 3rd, Mary Brown, Tom Manyfathers.
1/4 Mile Indian Boys' and Girls' Race—1st, Tom Manyfathers; 2nd, Ben; 3rd, C. Blood.

Second Day's Races

1/4 Mile Open Pony—1st, Fay, Miss Leeds; 2nd, Rosie, L. Zeteman; 3rd, Billy Sluway, Frank Hobbs.
Cow Pony Race—1st, Slipaway, Frank Hobbs; 2nd, Buck, Young Pine; 3rd, Frank C. Eagleraker.

Five-Eight Mile Dash—1st, Lady Hastings, Sandy Schnarr; 2nd, Jiggs, W. J. Adams; 3rd, Remona, Miss Leeds.
Seven-Eight Mile Dash—1st, Juliet, Miss Leeds; 2nd, Tomcat, Frank Hobbs; 3rd, Jiggs, W. J. Adams.

Consolation 1/4 Mile—1st, Swallow, Jim McNab; 2nd, M. Sorrel, Minnie Little.
Bucking Contest—1st, Andy Noel, on Peggy; 2nd, Mark Thompson, with Maggie; 3rd, P. Weaslehead, on K. Star.

Fair Notes

In spite of the busy season the attendance on both days exceeded that of last year and the big crowd appeared to be enjoying and appreciating every minute of both days' entertainment.

Interest around the judging rings for horses and cattle was most pronounced, as evidenced by the number of spectators surrounding these centres during the judging.

It seems to be the unanimous opinion of all interested on coming in touch with the big fair that its great success this year is to be ascribed to the untiring efforts of President McDonald, Secretary Gardiner and the managing directors working together for a highly successful fair.

The dances on both evenings of the fair were well supported, and afforded much pleasure to those in attendance.

Secretary Gardiner informs The Times that, judging throughout the whole fair seemed to have given general and universal satisfaction.

salting climax, with a close escape from death over the waterfalls, promises one of the biggest thrills the screen has known.
Teddie Gerard, American beauty whose name is a byword in European theatrical successes, returns to her native land in the leading role. She is supported by an excellent cast that includes Charles Meredith, William Taylor, Eleanor Hancock, Lillian Luckey, Frank Coleman, Boris Karloff, Jake Abrahamson and Jack Beck.

RUTH ROLAND'S NEW PATHE-SERIAL THRILLER HAS BACKGROUND OF SIERRAS, ALASKA AND ARGENTINE.

Ruth Roland's new Pathe serial thriller, "The Timber Queen," is filled with the fragrance of pine trees; the magnificence of mountain slopes; the salt tang of the ocean; the snap and pep of swash-buckling adventures; the lure of the unknown; the action of the story by Val Cleveland is enacted against a background of a lumber camp in the Sierras, Alaska and the Argentine Republic.

Val Cleveland is a veteran author, and knows how to concoct the sort of suspense-filled plot, rapid-fire action and spine-tingling thrills that are certain to please the serial fan. Director Fred Jackson has the right idea in serials. He believes in thrill and deed; skill and speed. He knows that one thrill or suspenseful situation should be finished up to plunge the reader into another. Action, action and more ACTION is his motto! And doesn't he know how to stage hazardous feats, dangerous thrills — and fights! He's the Tex Richard of serials. He comes on stage fighting battles! The story deals with Ruth Reading, who is heir to vast timberlands which the Timber Trust seeks to secure. She is also opposed by a second cousin who tries to prevent her from inheriting before she is twenty-one, as, under the terms of her grandfather's will, he will inherit the property if she is not married then. To complicate the situation, she must be married with her father's consent, and her father has been missing for years. He was believed dead, but word comes that he is alive. Ruth's task then is to find her father and get his consent to marry her lumber foreman, whom she loves and who is ever her loyal defender and valiant rescuer.

Ruth Roland adds brains to beauty and courage, and daring to athletic skill. Her wholesome, buoyant, optimistic personality has endeared her to millions of people the world over. In her they see the ideal woman—the real Outdoor American Girl!

"The Timber Queen" gives Miss Roland an opportunity to wear a variety of costumes — from snappy sports things to a wedding gown, with veil 'n' everything. Bruce Gordon is a manly hero, and other roles are played by such splendid actors as Val Paul, Frank Lackton, Leo Willis, Chris Linton, Al Ferguson and Otto Frees.

The first episode, entitled "The Log Jam," will be shown at the Empress Theatre soon. In it Miss Roland has many narrow escapes and performs many daring feats. She is rescued from a falling giant tree; she is thrown from her horse into a ravine; she takes a high dive into a cold mountain lake; she does some wonderful riding; she engages in some fierce fights; and last of all, she rides a box car which dashes down Thunder Mountain under its own weight, gathering speed as it swings around sharp curves and careens down steep grades, liable to jump the track at every dangerous turn!

Members of the Calgary Board of Trade consisting of a party of about 50 are stopping here on Saturday night, August 11th, on their way to visit the Mormon Temple at Cardston. In order to entertain the visitors, the Macleod and District Board of Trade are holding a smoker in the Town Hall on Saturday night at 9 o'clock, and it is hoped that a full attendance of both town and country residents will be on hand to greet our visitors and attend the smoker.

Premier Greenfield Will Visit Macleod

Through the channel of the Board of Trade Executive comes the statement that Premier Greenfield expects to visit Macleod at an early date.

SHOWING LADIES' WEAR

H. H. Scarff, representing Melven, Van Camp Ltd., Winnipeg, will show models of Ladies' Fur Trimmed and Cloth Coats and Fall Dresses at J. W. Morehead's Tailor Shop, 2nd Ave. on Friday and Saturday, August 17th and 18th.

PRESIDENT HARDING DIES VERY SUDDENLY AT SAN FRANCISCO

San Francisco, Aug. 3. Warren G. Harding, president of the United States, died instantaneously and without warning last night at 7:30 o'clock, a victim of a stroke of apoplexy, which struck him down in his weakened condition after an illness of exactly a week.

San Francisco, Aug. 3.—"That's good. Go on read more." These were the last words uttered by President Harding to Mrs. Harding. "Mrs. Harding was at his bedside looking at him when she paused and read to the president," according to Alfred Holman, San Francisco publisher and close personal friend of the president, who visited the sick room a few minutes before the end came.

Mr. Holman told interviewers that the president's hand was raised as he asked Mrs. Harding to continue reading. Instantly his expression changed. He was dead.

Today A Nation Mourns
San Francisco, Cal., August 3.—A nation today mourned the passing of its leader.

The people of the United States from coast to coast and from the lakes to the gulf and in the territories beyond the seas bowed their heads in grief, for their president was dead. In the early hours of last evening after a day which had brought renewed hope of recovery, death came suddenly and struck down Warren G. Harding with a stroke of cerebral apoplexy.

The end came instantaneously and without even a second of warning, at 7:30 o'clock. There was no time to summon additional physicians, no time to call the members of his official family and no time for medical skill to exercise its knowledge.

Mrs. Harding, the constant companion of her distinguished husband, was faithful to the end. She was reading to him a few minutes before 7:30 o'clock, when she noticed a shudder run through the frame of the man she loved, encouraged in adversity, and praised in success. Before she could arise from her chair, Mr. Harding collapsed in his bed.

Efforts Avail Nothing
Brig.-General Sawyer, chief of the

AUTHORITIES SAY WHY LLOYD IS SUCCESSFUL

"Harold Lloyd is not a one-man show." Aside from the spectacular comedian's own ability and personality authorities claim this is the outstanding reason for Harold Lloyd's success. He has surrounded himself with experts in the line of fun-making; he wins their confidence, and then gives them full credit for what they do.

Hal Roach, who has produced the Lloyd comedies for eight years, is also a capable comedy story writer. Fred Newmeyer, the director, is conversant with every quip and angle or screen comedy. Harley M. Walker, title writer, has been putting humor into Lloyd titles for six years. Sam Taylor and Jean Haves, gag men, do the "Harold Lloyd" business incidents that are introduced into the pictures.

They say of Harold Lloyd in film circles that he is the easiest and yet the hardest man in the picture world to work for. He is "easy" because he lacks temperament, is most congenial to work with, and will literally slave to put over what the "boys" give him to do. He is "hard" because he is the type of comedy he produces will permit only a certain kind of "business" and this "business" must be clean above everything else.

Lloyd's latest feature comedy, "Dr. Jack," will be shown at the Empress Theatre next Wednesday and Thursday, and is one of the best examples of what might be called "luxury screen comedy" ever seen. While his last effort, "Grandma's Boy," was uproarious from start to finish, "Dr. Jack" contains more laughs to its footage, took more time to produce and cost more.

SOME DOCTOR!!!

If you're sick of this life
With its toil and its strife,
Remember that joy will come back;
Just watch for the day
When the papers will say:
He's arrived here at last—DR. JACK.

There are doctors in town,
Yes, and some of renown,
And others that you class as quack;
But the one full of pep,
And the man with a rep
Is the one you should see—DR. JACK.

If you walk with a crutch
And it hurts very much,
To tie to the corner and back,
You'll laugh and you'll roar,
And won't limp any more.
As soon as you see—DR. JACK.

If your boy, as a rule,
Wants to stay home from school,
And you think he deserves a good whack,
Just take it from me,
You will learn when you see
How he's cured by our friend—DR. JACK.

You'll laugh till you cry,
And you'll wonder why
That some folks a smile never crack.
If you know such a man,
It would be a good plan
To tell him to see—DR. JACK.

Harold Lloyd as Dr. Jack, Prescribes at the Empress next Wednesday and Thursday.
A small man may make a big job shrink, but it takes a big man to make a small job grow.—The Shield.

staff of physicians, and two nurses, came hurriedly and did all they could, but it availed nothing.
Great as was the shock to all who dwell under the United States flag, and to people in many lands, his kindly and his lovable personality, had become a world figure, the greatest shock came to his wife reading by his side, but she did not collapse.

But Did Not Break Down

"She was shocked, of course, and at first unable to realize that she had lost the husband who had made up all the interest in her life for so many proud and happy years," said General Sawyer later.

Mrs. Harding was standing the shock well early today, but whether she could stand up under the grief that bore down upon her as the sad journey back to Washington is made, was another question. Those who know her best say that she will.

When dawn came over the mountains and lighted up the Golden Gate this morning, almost complete arrangements for the trip—the saddest transcontinental journey in the history of the nation—had been made.

Remains Sent East Today

The body will leave San Francisco on a special train at about seven o'clock Friday evening and go direct to Washington by way of Reno, Ogden, Cheyenne, Omaha and Chicago. From Washington arrangements have not been definitely made, but it is expected that the body will lie in state in the rotunda of the Capitol, where a sorrowing people will have often-times before their eyes the last respects to their leaders and the heroes they have loved.

Burial at Marion

The burial will be made at Marion, Ohio, the small Ohio city which Warren G. Harding made known around the world, because there from poor and humble surroundings, he struggled upward until the people of the United States awarded him the highest gift and paid him the greatest honor within their power to bestow. President Harding was a man who loved "the home folks," and if he had had time to leave a parting word last night, it undoubtedly would have contained instructions that he be buried in the town that knew him as "Warren," where he called most everyone by their first names.

Back In Same Car

The body of the president will be borne in the same car as carried him. (Continued on Page Two)

EMRESS THEATRE PROGRAMME

FRIDAY—SATURDAY—August 10th and 11th:

TEDDIE GERARD and a competent cast, in a Drama of youth gone wild. A romance of silent trails and rushing waters.

"THE CAVE GIRL." Enacted in mid-winter in the natural wonders of the Yosemite valley. Raid your neighbors harder to make him love you. That is what the cave girl did.

WILLIAM DESMOND in—

"AROUND THE WORLD IN 18 DAYS."

Also Comedy—

"BLAZE AWAY."

MONDAY—TUESDAY—August 13th and 14th:

A great big special production, by George B. Milford the author of "To-Be David."

"JAVA HEAD."

Featuring LEATRICE JOY, JACQUELINE LOGAN, RAND HATTON and GEORGE FAWCETT.

The story appeared in the Saturday Evening Post and the picture was made on the original locations in the most picturesque part of America.

Also—

"PATHE COLOR REVIEW."

NO ADVANCE IN PRICES.

WEDNESDAY—THURSDAY—August 15th and 16th:

An all comedy programme. The greatest prescription for worry and gloom.

Field Crop Competitions
Field crop competitions under the auspices of the agricultural societies at six different points in the province will be held this year.

Grow Beans Satisfactorily
The growing of white beans has been successfully carried out on the irrigated lands in the vicinity of the Peace River, near Medicine Hat, and the surrounding samples of the product, a variety of bean grown is named "The Great Northern". The success of this crop is interesting in view of the development of new products for irrigated lands in the south, and in view of the fact also that Alberta has been importing large quantities of beans in the past. The success of this crop seems to be assured for the irrigated lands.

Inspecting Northern Lines
Inspection of the railway lines in the Peace River country, including the E. D. and C. and Central Canada, is being undertaken for the Alberta Government by Messrs. James Kennedy and C. E. Cartwright, two experienced railway engineers. A full investigation into the condition of the roads will be made.

Tourists Buy Farm Lands
Tourists who have visited the province recently from United States, registering at the Calgary Auto Camp, have purchased lands in Alberta and will engage in farming here. Twelve of these tourists in the past month have arranged to purchase farms in this province, and one of them has purchased four farms for himself and his sons. Over 4,000 tourists have registered at the Calgary Auto Camp, a large number of them having travelled over the new Banff-Windermere highway. They are all delighted with the scenery provided in the Canadian Rockies.

Fruits Grow Well
Displays at the "Lethbridge Fair" have established the fact that the climate can grow successfully in certain districts of Alberta. Irrigation farmers in the south had displays of cherries, plums and small fruits, as well as of tobacco. All of these were grown on irrigated lands. The U. F. A. at Vauxhall, which showed fifty different soil products. Fruit growing has been taken up in several parts of both southern and northern Alberta with considerable success, and this industry is taking on larger proportions each year.

Sapiro Says

(Continued from Page One)

Wheat Over-Production
The speaker then went on to point out that this year there was going to be an over-production of wheat that would be a help, but not to the grower. That smart dealer can tell it, but he only supplies it to the miller as he wants it.

No Insuperable Task
"There is not a single thing the dealer can do, that you cannot do," he declared with emphasis amid cheers. "The prices must be made on the basis of the crop moving into the consuming market. It must take what it can absorb at a fair price and then get rid of the rest in the lean years."

Point of Technique

Mr. Sapiro was careful to point out that there is a point of technique to be considered; that what suited one crop did not suit another. Each country or group of growers must work its own plan, not only to suit the crop, but to suit the men who are handling it. There must be a definite plan and a definite aim. Some crops can be organized completely, but wheat will never be organized to the hundredth degree until it is done internationally. First, crops must be organized by the commodity and not by the locality and the individuals bound by long term contracts.

Alberta Organization

Speaking of organization in Alberta, the speaker said there has been enough time, money and energy spent here to have organized the whole of Canada, but today it is in the same place, at all intents and purposes, as it was ten years ago. There has been a little petty larceny, and some legislation obtained, but no progress made. There is no miracle performed by co-operation unless you know where you are going, and there is the right kind of machine and the personnel must be obtained.

No Amateurs Allowed

"We have no amateurs on our associations. No matter how good a farmer a man is he must be an efficient man. We do not pay our men \$4,000 or \$6,000 a year. We pay him \$60,000 a year to sell cotton. The farmers know that they have been paying all these huge sums for men who have been working against them and they realized that it would be cheaper for them to have them working for them. We use the very highest type of technical expert. We allow no amateurs to muddle us up," he declared.

No Speculation

"We do nothing except sell what we have to sell. We have no stores. We have no speculation. There is no profit. We are organized for one purpose and nothing is allowed to interfere. I hope you get that. A great temptation is, so soon as men are organized to get them to do something, to get them to do something else. That is all wrong, they must be single-minded organized for one purpose and they accomplish it sanely and steadily. The organizer is not against anybody but just for the farmer's interests. We have no political group and when we want anything politically we know how to get it.

"The state is as dear to the California farmer as it is to the California merchant. There was no content in Minnesota because of wrong methods and there is content in California because they were organized right. The farmers there have more money in the bank and more life insurance; they rank first in roads, in schools, in churches, in libraries, in salaries for their teachers. I am more proud of that than anything else," said Mr. Sapiro with some warmth.

"Time was when we could not support those things. Less than 18 years ago the school houses were boarded up nine months of the year because they could not afford to keep them open. Where you have properly organized, co-operative marketing, you have no less than 100 years' everything is in good shape. There are no big profits but steady profits. And they can convert them into the best things of this life."

John McFarland, Beck Pool owner, said that the Beck Pool everything is in good shape. There are no big profits but steady profits. And they can convert them into the best things of this life."

"The Alberta Pacific Grain Company will turn over its entire string of elevators on the five-year payment plan suggested by Mr. Sapiro, and on organization of this province, and I will be glad to assist in any way to make possible the co-operative marketing of this year's crop."

This was the statement made to the Herald representative Saturday morning by John I. McFarland, president of the Alberta Pacific Grain Company.

What percentage of the elevator facilities of this province does the Alberta Pacific control? Mr. McFarland was asked.

"About 25 per cent," he replied. "Another 25 per cent. Available necessary to make up the 50 per cent. that Mr. Sapiro says is necessary for the success of the pool be secured?" he was further queried.

"It is to be," he replied. "The U. G. G. has a good percentage also. You know that Mr. Cramer has announced that those facilities are ready for the pool, do you not?"

"About 40 per cent. of the elevator facilities of this province," was Mr. McFarland's reply.

"Do you not think that the remaining ten per cent. necessary would be easy to secure?" Mr. McFarland was asked.

"Yes, I do."

Believes Plan Feasible
"Doesn't that make the plan fairly easy, then, according to your own statement previously that the largest difficulty would be in getting the necessary storage facilities?"

"Yes, I believe that should make it easy to make the pool successful," replied Mr. McFarland.

Edmonton, Aug. 24.—Organization of the "co-op seventeen" to proceed with the formation of a pool to handle, along co-operative marketing lines as laid down by Aaron Sapiro, the 1923 wheat crop of Alberta, will go on immediately, said H. W. Wood president of the U. F. A., is named as chairman of the committee. Stephen Lunn, chairman of the U. F. A. pool committee; A. E. Brown, Westlock, and W. J. Jackman, chairman of the marketing committee of the U. F. A., are members, and Hon. J. E. Brownlee is also named as a member, as representing the provincial government's co-operative marketing committee.

Twelve members remain to be appointed. The names of these have not yet been given, but will be announced immediately they have been offered and have signified their

Sapiro Says

(Continued from Page One)

Wheat Over-Production
The speaker then went on to point out that this year there was going to be an over-production of wheat that would be a help, but not to the grower. That smart dealer can tell it, but he only supplies it to the miller as he wants it.

No Insuperable Task
"There is not a single thing the dealer can do, that you cannot do," he declared with emphasis amid cheers. "The prices must be made on the basis of the crop moving into the consuming market. It must take what it can absorb at a fair price and then get rid of the rest in the lean years."

Point of Technique

Mr. Sapiro was careful to point out that there is a point of technique to be considered; that what suited one crop did not suit another. Each country or group of growers must work its own plan, not only to suit the crop, but to suit the men who are handling it. There must be a definite plan and a definite aim. Some crops can be organized completely, but wheat will never be organized to the hundredth degree until it is done internationally. First, crops must be organized by the commodity and not by the locality and the individuals bound by long term contracts.

Alberta Organization

Speaking of organization in Alberta, the speaker said there has been enough time, money and energy spent here to have organized the whole of Canada, but today it is in the same place, at all intents and purposes, as it was ten years ago. There has been a little petty larceny, and some legislation obtained, but no progress made. There is no miracle performed by co-operation unless you know where you are going, and there is the right kind of machine and the personnel must be obtained.

No Amateurs Allowed

"We have no amateurs on our associations. No matter how good a farmer a man is he must be an efficient man. We do not pay our men \$4,000 or \$6,000 a year. We pay him \$60,000 a year to sell cotton. The farmers know that they have been paying all these huge sums for men who have been working against them and they realized that it would be cheaper for them to have them working for them. We use the very highest type of technical expert. We allow no amateurs to muddle us up," he declared.

No Speculation

"We do nothing except sell what we have to sell. We have no stores. We have no speculation. There is no profit. We are organized for one purpose and nothing is allowed to interfere. I hope you get that. A great temptation is, so soon as men are organized to get them to do something, to get them to do something else. That is all wrong, they must be single-minded organized for one purpose and they accomplish it sanely and steadily. The organizer is not against anybody but just for the farmer's interests. We have no political group and when we want anything politically we know how to get it.

"The state is as dear to the California farmer as it is to the California merchant. There was no content in Minnesota because of wrong methods and there is content in California because they were organized right. The farmers there have more money in the bank and more life insurance; they rank first in roads, in schools, in churches, in libraries, in salaries for their teachers. I am more proud of that than anything else," said Mr. Sapiro with some warmth.

"Time was when we could not support those things. Less than 18 years ago the school houses were boarded up nine months of the year because they could not afford to keep them open. Where you have properly organized, co-operative marketing, you have no less than 100 years' everything is in good shape. There are no big profits but steady profits. And they can convert them into the best things of this life."

next meeting will be at the home of
Mrs. Lavern Prince. Literary lec-
tures are given at most of their meet-
ings. They are taking up the works
of Ella Wheeler Wilcox. Mrs. Eva S.
Fagg gave the last lecture.

Mr. Gilbert Hartley and sisters,
Mrs. Eliza Himmars, are leaving this
afternoon, Aug. 25th, to see their moth-
er, who is seriously ill at the Card-
ston District Hospital.

Mr. George Skelding, from Macleod
and Mr. Atkinson, from Winnipeg,
representing the interest of the C.P.
R. Railway, made an investigating
trip through our district as to where
the most feasible location for a rail-
way would be. Some of the most
prominent men from Cardston, Glen-
wood and Hill Springs, met at Card-
ston with these gentlemen and the de-
cision was to finish the grade that is
already made from Macleod to the
Waterton river, then across the river
up through Glenwood and Hill Spring
around the country near Caldwell,
Leavitt, into into Cardston, most
probably in 1924.
